

Exemption from payment for day care and SFO

The Government has decided that parents will not have to pay for day care and SFO (before and after school day care) during the period the services are closed down.

The exemption from parental payment applies to all children in day care and SFO, including those receiving childcare under the emergency provisions that provide this service for children of parents with functions that are vital to the operation of society and public services and children with special care needs.

Trondheim Local Authority asks parents/guardians in municipal day-care centres and SFO to pay the invoices that have already been sent. A reduction will be given on future invoices for the days these institutions have been closed. Those people who cannot pay due to financial difficulties are asked to contact the Department for Early Development and Education (*Fagenhet for oppvekst og utdanning*).

Private day-care centres do their own invoicing and we therefore ask parents to contact their day-care centre for information about invoicing and payment during this period.
