

Side elevation drawing of a road profile. The drawing shows a road surface with a central section labeled "HOLTEVEGEN Profil 76" and a width of "6.0 m Vegbreidde". To the left, there is a "3m Fortau" (sidewalk) and a "3m Renovasjonsareal" (renovation area). The total width of the left side is "1m Grøntstribet" (green strip). To the right, there is a "2.4m Tilpassing avkjørsel" (adaptation of the driveway). A red dashed line indicates the "Eiendomsgrense 197/881" (property boundary). Below the road surface, there is a section labeled "AVKJØRSEL" (driveway) and a note "Planlagte VA-ledninger - se egen tegning." (Planned water and sewer lines - see own drawing).

Side elevation drawing of a road profile. The drawing shows the existing road level (grey line) and the proposed road level (black line). The proposed road level is higher than the existing level. The drawing includes labels for '3m Fortau' (3m sidewalk), '5,5 m Vegbredde' (5.5m road width), 'HOLTVEGEN Profil 60' (Holtvegen Profile 60), 'Tilgåsning planargal' (Tilgåsning planargal), and '2m' (2m). A red dashed line indicates the 'Eiendomsgrense 197/501' (Property boundary 197/501). A note below the drawing states: 'Gjerde, hekk og plen reetableres etter graving for ny veg' (Fence, hedge and lawn are re-established after excavation for new road). Below the drawing, it says 'Planlagte VA-ledninger - se egen tegning.' (Planned VA-pipes - see own drawing).

Tegningsnummer: TF -- 101	Revisjon: O-01
-------------------------------------	--------------------------

MERKNAD
Tverrsnittene relaterer seg til profilnummer gitt av plantegning.

Veganlegget er overordnet prosjektert ifm. reguleringsplan.
Endringer kan forekomme ifm. detaljprosjektering i senere faser.

Graving for infrastruktur under bakken kan, og vil sannsynligvis gi større graveutslag enn for vegbygging som vist i snittene.
